

## Workshop #5 CE-MS coupling: new developments and applications

The workshop will focus on the latest instrumental developments and cutting-edge CE-MS applications for small molecules, proteomics and biotherapeutics.

The provisional program is as follows:

Pr. Christian Neusüß from Aalen University: New instrumental developments of CE-MS coupling

Dr. Julie Schappler from Geneva University: Insight from CE-MS approaches for pharmaceutical applications.

Dr. Rabah Gahoual from Paris Descartes University: CE-MS-based proteomics in biomarker discovery and clinical applications

Dr. Yannis Francois from Strasbourg University: Overview of CE-MS coupling for biotherapeutic applications.
